## FOREWORD

*by*

JAMES F. WOODWARD

*Secretary of Internal Affairs*

In placing before the public this statistical record of Pennsylvania's industrial progress in 1926, I invite business men and others throughout the State to make full use of the statistical facilities of the Department of Internal Affairs. Sound business is everywhere being conducted more completely than ever before on the basis of ascertained facts instead of guesswork and conjecture. This accounts for the insistent and growing demand on the part of business executives for facts—pertinent, authoritative, and up-to-date facts. To meet this demand should be the aim of every public bureau and statistician dealing with the problems of industry. Unfortunately, a publication such as this can hardly be compiled and printed in time to serve as the latest possible record of a year's business. To supplement its printed reports, therefore, the Department of Internal Affairs through the Bureau of Publicity and Information releases to the newspapers, Chambers of Commerce, and similar bodies, the latest statistical information as soon as it is compiled by the Bureau of Statistics.

During the past year the Bureau of Statistics has been reorganized with a view to serving the business interests of Pennsylvania even more effectively than before; the field force has been augmented; fresh contacts with Chambers of Commerce throughout the State have been established; and a program of publicity has been inaugurated so that the industrial and other reports for the different counties and cities of the State may be made available locally as promptly as possible. Much attention is being devoted also to improving the quality of the statistical data put out by the Bureau, in order that the reports of the Department may be as complete and accurate as possible.

I have felt ever since I took office that there was a decided need for a central bureau of statistics serving all the different State Departments, and that the logical place for such a bureau is in the Depart-

ment of Internal Affairs. It is with satisfaction that I here record the growing use that is being made by the various State Departments, and others, of the facilities of the Department as a central source of statistical information of all kinds. A reference file of recent and important statistical documents of the Federal Government is maintained in the Bureau of Statistics, so that requests for such information can be readily answered. At all times, furthermore, the Bureau of Statistics is prepared to furnish to responsible inquirers special compilations of the latest figures for particular lines of industry or for individual counties or cities in the State. By these means the Department is attaining with increasing effectiveness the standards of service to this State that I have always set as our goal.

The Department receives frequent inquiries as to the standing of Pennsylvania with relation to other states in the manufacture of various products. The recognized source of information in all matters where the production of several states or of the whole country is concerned is the United States Census Bureau in Washington. In order to make this book more widely useful, a number of tables based upon the Federal Census have been included at the end. These figures relate to 1925, the latest year in which a Federal Census has been taken.

Pennsylvania's position as an industrial State is well illustrated by the fact that, ranking only thirty-second in area and having only 8.2 per cent of the nation's population, she nevertheless in 1925 produced 11 per cent of the entire manufacturing output of the United States. In number of wage earners and amount of wages paid the proportion is 12 per cent, while in primary horsepower generated Pennsylvania leads all other states with 15 per cent of the country's total.

Pennsylvania as is well known surpasses all states, with the single exception of New York, in the total value of manufactured products. In many lines of industry Pennsylvania ranks ahead of all other states, and a list of articles of which she is the leading producer would reach a formidable length. Among the more important of such products, I would call attention to the following: Portland cement, concrete block and tile; face brick, silica brick; cotton worsteds; chocolate and cocoa products; ice cream; plate glass, window glass; hair cloth; pig iron, rails, finished rolled products and forgings, structural shapes, wire rods, iron bars, boiler plate, scrap iron and steel; hosiery of all descriptions, including silk, rayon, cotton and wool; limestone, quicklime, roofing slate; many kinds of machinery; rough brass and bronze castings; building paper, book paper (plain); steam engines; raw silk thrown under contract, silk yarn, cotton yarns, rayon, woolen and

worsted yarns, and broad silks. Pennsylvania has the distinction of publishing more daily newspapers than any other state. Moreover, she has the largest number of railroad and electric railway repair shops. Other important lines of industry in which Pennsylvania is supreme are the mining of anthracite and bituminous coal and the production of gas and coke.

The present volume follows in the main the arrangement of preceding volumes, but for the benefit of those not familiar with earlier editions a few words of explanation may be helpful. The first three sections are devoted to industrial statistics, in which are included data concerning the number of manufacturing and mining establishments, number of wage earners, number of salaried persons, amount of wages and salaries, amount of capital invested, and value of production. The above items are shown separately for different lines of industry, as well as in the aggregate, and they are given both for the State as a whole and for individual counties and cities separately. In these industrial tables the so-called "productive industries" only are included, such lines of business as wholesale and retail trade, building and contracting trades and public utilities being omitted.

The fourth section of the book is devoted to statistics of public utilities, including steam railroads, street railways, telephone and telegraph companies, electric light, heat, power, and steam heat companies, natural and manufactured gas companies, and water companies.

The fifth section is made up of tables on a variety of subjects, such as crude oil production, retail and wholesale trade, agriculture, banking, and some miscellaneous industrial statistics not included elsewhere.

Following the practice begun in 1925, this volume is devoted to business statistics only. Taxes and assessments of Pennsylvania municipalities, which were formerly included as part of this publication, deserve separate consideration and are now published in a separate volume.

Throughout the book where the word "tons" is used, it should be understood as referring to net tons of 2,000 pounds each; otherwise, gross tons are specified.

For a better understanding of the tables in Parts II and III, the following explanation given in previous volumes should be repeated here. It will be noted in certain industries that value of product is shown, but no figures are given on capital, employes or wages. The

reason is that many concerns manufacture a large variety of products and the capital, employes, and wages are coded with that product which represents the largest value. Illustrating this method, I will mention the case of a company engaged in the manufacture of steel. It may produce pig iron, blooms, billets, slabs, steel castings, iron castings, brass castings, tool steel, finished machinery, steel wheels, ordnance, etc. It would be manifestly impossible to separate its capital, employes, and wages among these various items. The arbitrary rule mentioned above was therefore adopted to meet a situation which would otherwise be difficult in the extreme.

## PRINCIPAL STEAM RAILROADS

The principal railroads of the State may be grouped into two general classes, those operated by well defined systems and by independent companies.

The principal railroad systems operating in the State are:

Baltimore & Ohio  
 Buffalo, Rochester & Pittsburgh  
 Buffalo & Susquehanna  
 Bessemer & Lake Erie  
 Central Railroad of New Jersey  
 Delaware & Hudson  
 Delaware, Lackawanna & Western  
 Erie Railroad  
 Lehigh & New England  
 Lehigh Valley  
 Monongahela Railroad  
 Mount Jewett, Kinzua & Riterville  
 New York Central  
 New York, Chicago & St. Louis  
 New York, Ontario & Western  
 New York, Susquehanna & Western  
 Pennsylvania Railroad  
 Pittsburgh & Lake Erie  
 Pittsburgh & West Virginia  
 Reading Company  
 The Pittsburgh & Shawmut  
 The Pittsburgh, Shawmut & Northern  
 Union Railroad  
 Western Maryland  
 Wilkes-Barre & Eastern

These twenty-five companies operate either by lease or ownership of stock, one hundred and eight subsidiary companies, whose lines are wholly or mostly in this State. The following table shows the subsidiary companies controlled and the mileage of each subsidiary company in this and in adjoining states:
